

January 2019 Tropical Ecology Course

EES 475: Field Studies in Ecology: PERU

Fall Semester 2018 • Winter Session 2018-19 travel to Peru

- Visit one of most diverse regions in the world in the western Amazon rainforest and study sunny South American tropical ecosystems over the cold, dark Maine winter.
- Zip-line through the canopy, canoe through flooded forests, swim with pink dolphins, and fish for piranha!
- See tropical birds, sloths, orchids, bromeliads, poison dart frogs, insects & much more!
- Have close encounters with multiple species of primates, including pygmy marmosets (the world's smallest primate), squirrel, woolly, and owl monkeys.
- **Instructors: Lindsay Seward and Alessio Mortelliti**
- **In class preparation: Fall 2018**
- **Field trip: January 7–16, 2019**
- **Course fee: \$3,057 includes everything except tuition**
- **Prerequisite: ecology course**
